PROFILE

Presenter, essayist, writer and entrepreneur, I document Africa's digital transformations on air and in writing. I present Ifriky FM's 6:45pm main news bulletin and host Africa Tech, the station's programme on African technology and innovation. In parallel, I founded Lobaka, a voice infrastructure for a multilingual world. Trained in cybersecurity and data science, I use this technical foundation to explain, investigate and build with precision.

EXPERIENCE

Presenter · Host · Columnist

Ifriky FM, Algiers · since January 2024

- Main 6:45pm News and 2:00pm news flash: preparing and presenting bulletins.
- Africa Tech: designing and hosting the weekly programme devoted to African technology and innovation, launched in November 2023.
- Nzamba: hosting the magazine focused on African startup ecosystems and entrepreneurship, since September 2026.
- Eco Africa columns, interviews, live presentation, format design and editorial production.

Founder

Lobaka, Algiers · since 2026

- Designing and developing Lobaka Sasa: live multilingual audio in the browser, with several channels available via a QR code on each listener's phone.
- Pilot sessions: validating use cases with organisers, speakers and audiences; first milestone of up to five channels and 150 listeners per session.

Essayist · Independent author

moisebselph.com · since 2026

- Writing and independently publishing essays and analysis series on African economies, payments, artificial intelligence, work and entrepreneurship.
- Recent texts: The Entry Price; Fifteen Dinars Withdrawn for One Dinar Spent; Fifty Licences for a Single Market.

INTERNSHIPS · CYBERSECURITY, NETWORKS & SYSTEMS

Technical internships

INSIM, CRSIC, GICA CETIM, SONEGGAZ and ANEJ · Boumerdès · 2023–2024

- INSIM: Rocky Linux 8 PXE server with Kickstart, user-space segmentation and Ansible automation.
- CRSIC: Sophos XG firewall, Windows Server 2022 Active Directory and LDAP authentication via captive portal.
- GICA CETIM: pfSense, centralised LDAP, filtering and bandwidth control. SONEGGAZ: file sharing, redundant NFS and system recovery.
- ANEJ: welcoming and guiding refugees; support for entrepreneurship-course facilitation.
